Profile

Started coding HTML, CSS, and PHP at 12 wanting to clone a popular website of the time, Taringa. And started to gain professional experience on Freelancer.com at 15.

Studied Informatics Engineering at Universitat Politecnica de Valencia and joined 2BE Studios at 18, working on projects for multi-million dollar companies as Inspection Manager.

Transitioned into the web3 space at 19, working on Flits, an app with 50,000+ users, focusing on design, frontend, and backend development. Currently, I am the Lead Developer at DogeCash App, managing services for 20,000 users monthly.

Skilled in planning, designing, and deploying tech solutions, I thrive in dynamic, tech-driven environments.

4,450+
Commits on GitHub.

50,000+
Lines of code.

80+
Projects.

Work Experience

Lead Developer

DogeCash LLC (2022 - present)

DogeCash App is a cryptocurrency platform with 20,000 active users per month. As a Lead Developer in a small, dynamic team, I am involved in the entire deployment process, from conceptualization to launch.

My responsibilities include designing and developing key features, guiding team members to excel, and ensuring our infrastructure scales effectively.

Full-Stack Developer

Blockworks B.V. (2020 - 2022)

I joined Flits App during the peak of the pandemic, marking my entry into the crypto world. At this small startup, my varied roles adapted to the company's needs. Primarily, I focused on maintaining the Laravel backend infrastructure, serving over 50,000 users.

Full-Stack Developer

2BE Co (2019 - 2020)

At 2BE Studios, a design and development studio, I worked on significant projects for multi-million dollar companies such as Inspection Manager. My role involved full stack development, contributing to both the front-end and back-end of various high-profile projects.
